Slope Rating

What is Slope Rating?

A Slope Rating is the number which indicates the relative playing difficulty of a course for bogey golfers, compared to scratch golfers.

It is the combination of the Course Rating and the Bogey rating that allow us to calculate the Slope Rating of a set of tees.

That difference in the two rating figures is then multiplied by a fixed number to arrive at the Slope Rating. Slope Ratings range from 55 to 155 - with 155 being the most difficult.

Slope Ratings are gender specific and you must ensure the tee you play off has been rated for your gender.
